ClearView Flex delivers secure, low-latency, frame-accurate and color-accurate review sessions for you and your remote collaborators

**High-quality streaming**

Stream from a physical Flexbox or virtually from the cloud with up to 8-bit 4:4:4 and 10-bit 4:2:2 HDR with Rec.2020 or P3-D65 colour spaces

**Conference/annotation support**

The enhanced in-channel comms, and annotation feature enables users to share feedback in real-time and collaborate more efficiently.

**Multi-device support**

Supports up to 40 participants in a session, with streams viewed on tablet, phone, PC/MAC or through Apple TV via a basic internet connection.

**Ultra-low latency guaranteed**

Collaborate at the speed of light with sub-100ms remote live streaming capability.

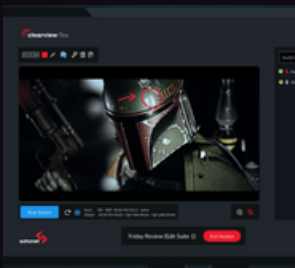

**Surround sound**

2-channel stereo audio support and 5.1 surround sound via the Apple TV app.

**Studio grade security & 24/7 support**

Independently audited with end-to-end stream encryption plus default air gapped security and our team of industry experts are on-hand to provide unmatched support.

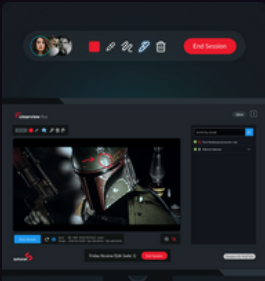

**WORKS WITH ALL POST WORKFLOWS AND VIDEO SOURCES**

- ClearView Flex Starter and Pro are perfect for editorial reviews, sending video sources from AVID Media Composer, Davinci Resolve, Adobe Premiere Pro, Flame Apple Final Cut Pro and others.
- Also great for sound mixing and editing reviews using AVID Pro Tools, Adobe Audition and others.
- ClearView Flex Glow is perfect for post workflows involving high dynamic range (HDR),
- ClearView Flex is approved by every major studio.

ClearView Flex is used by these and other leading film, TV and advertising studios and their post partners

ClearView Flex is available in three packages, giving you the flexibility to choose the most appropriate combination of functionality and performance to meet your needs at different stages of the production workflow.
